Forecast for Friday 03 Jun 2022

Weather: Dry through the morning, with variable, often large amounts of cloud. During the afternoon, slow-moving showers are expected to break out, and some of these will turn heavy and perhaps thundery for a time, before fading away through the evening. Becoming quite windy by late evening.

Chance of cloud-free hill tops above 600m: >90% during dry conditions. Should showers become more persistent through the afternoon, reduces to 60%.

Low cloud and visibility: Some valley fog patches possible until dawn. Otherwise summits should be largely clear, although during and after showers, occasional patches of cloud are possible above 600 metres. Good visibility outside of any showers.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Even with rather cloudy skies at times, UV levels will be in the high category, so adequate sun protection is recommended. It will be warm by the afternoon, especially in the valleys, so ensure you have plenty of water and stay hydrated.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
02:00 on Fri 03 Jun 2022	0.2mm	0.2mm	0.2mm

Forecast for Saturday 04 Jun 2022

Weather: A dry start, though becoming cloudier from the south through the morning, with an increasing risk of rain, showers or thunderstorms during the afternoon. A brisk east or northeast wind, making it feel quite cold in association with rain later. Moderate UV levels.

Maximum wind: East or northeast, 35 mph, some buffeting possible.

Chance of cloud-free hill tops 600m: 40% until after dawn, becoming 80%, reducing to 40% again by evening.

Low cloud and visibility: Broken cloud above 400 metres likely across eastern hills through the early morning, lifting and breaking soon after sunrise. Then the main base above the summits, but depending on persistence/intensity of any rainfall, bases may lower to 400 metres at times from mid-afternoon, with increasing frequency into the evening. Good visibility ahead of the arrival of rain.

Temperature: **Valleys:** Plus 7 Celsius becoming plus 17 Celsius
At 600m: Plus 8 Celsius increasing to plus 11 Celsius for a time
Freezing level: Well above the summits
